**100% Cultivation in Germany**

# The world's first Token backed by real Cannabis

Germany legalizes Cannabis! Deutsche Anbaugesellschaft DAG GmbH offers several hundred cannabis social clubs expanded cultivation space at their own location. The “**Deutscher Cannabis Token**” (**DECT**) will have a direct link to the real cultivation of cannabis.

## DECT Key Features

### Scarcity & Tradability

The Deutscher Cannabis Token token is limited to 200,000 DECT and only 180,000 will be in circulation. The benefit for cultivation systems and legalization in Germany makes the DECT a scarce asset.

### Link to Real Assets

The DECT token will have a direct link to real values in the form of cannabis plants. The link to the real economy will create a unique asset with a perspective stable development.

### Cannabis from Germany

The German government has decided to legalize or decriminalize cannabis for recreational use in 2024. This will create a new billion-dollar market for cannabis in Germany.

OUR PLAN

# Cultivation of Cannabis in Germany

At our location in Mecklenburg Vorpommern, we are building Germany's largest and most modern cannabis cultivation facility. We are also developing and planning the use of modern AI technologies and block grove-based systems for efficient cultivation and maximum yields. The entire site will be managed in a self-sufficient and sustainable manner.

Contract

# DECT connects Crypto with the Cannabis Market.

The "**Deutscher Cannabis Token (DECT)**" will represent real cannabis plants once we grow cannabis for recreational use at our location. The crop yields of the plants (in grams) are displayed with details in the NFT holder's user account. Additional buybacks and utility through our blockchain and AI-based farming systems will further add value to the token.

- 200.000 Total Supply (90% in Circulation)
- Link to planting site NFTs with Yields (in g)
- Regular Buybacks with Harvest Yields
- Access to modern blockchain and AI Systems
- Tradable on international CEX and DEX

# Advantages of DECT

**Community Friendly Distribution**

The unique design of the DECT distribution means that nothing stands in the way of long-term organic growth. There are no discounted tokens, each token is purchased at a uniform price and there are no team or company tokens! Our focus is on growing and selling cannabis, which allows us to generate real revenue and add to the token over the long term. Because each

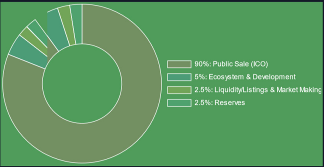
token is directly associated with a cannabis plant through an NFT, we have a scarce and unique crypto asset here.

- Name: Deutscher Cannabis Token
- Ticker: DECT
- Type: Crypto Asset
- Token Standard: ERC20
- Total Supply: 200,000 DECT
- Registration Country: Germany

## DECT Tokenomics



### 90% Owned by the Community

Under the ICO, 90% of the DECT will be sold publicly at a fixed price (without discount) and will be owned by the community. Only 10% will remain in the company for listings, market making and development of the systems and solutions.

FACTS AND FIGURES

## We are 100% Transparent

The DECT token reflects a globally unique project. Germany will soon legalize cannabis for consumption purposes. We have already been preparing everything since the beginning of 2023 and will start cultivating cannabis as a "first mover" on the market. The token serves as a link between the crypto world, cannabis cultivation and the technologies used.

Forstmann & Büttner PharmaLawyers

### Checked by Lawyers in Germany

A regulatory self-assessment prepared by lawyers came to the conclusion that the DECT token falls under the category of a traditional crypto asset. According to the lawyers, the ICO is not subject to approval.

### German Company and Cultivation in Germany

We are proud of our company location in Germany. Our company and our cultivation site are in Germany and we are subject to German law. Quality is very important to us, which is why the DECT token is issued from Germany.

## DECT at the DKM 2023

As the leading trade fair for the finance and insurance industry, DKM is one of the most important trade fairs in Germany. We as Deutsche Anbaugesellschaft DAG also met and exchanged ideas with interested parties at DKM 2023, the leading trade fair for the finance and insurance industry, with a stand in Hall 3. On both days of the trade fair, we talked to potential partners, financial experts and interested parties and answered questions about the project and our DECT token. We were delighted with the consistently positive feedback and look forward to further trade fairs and events.

ROADMAP

## This is How we Proceed

### 1st - 2nd Q 2023

### the corporate

e company and assembling
arters of 2023 saw the
latform by our development
team, the regulatory classification of the DECT token by our Lawyers, the launch of initial marketing and press activities and the establishment of additional operational business units.

### 3rd Quarter 2023

### Development and Marketing

During this period, initial marketing and press activities were launched in Germany for the DECT token and for our company, and conceptual development of the DECT Grow system began. We also began intensive political networking activities and established or negotiated partnerships in the cannabis, blockchain, and AI industries. Partnerships and collaborations will be announced on our website.

## 4th Quarter 2023

### Political Activity and Development

In the last quarter of the year, we naturally keep a very close eye on the legislative process in Germany and exchange views with the federal government, the states and the European Union. In addition, our development team starts the conceptual development of the DECT-S2S system, which will be made available to cultivation companies and cannabis social clubs. Furthermore, the development of the cultivation management system DECT-Grow starts.

## 1st Quarter 2024

### Collaboration with Cannabis Social Clubs

At the beginning of 2024, we will enter into the first collaborations and contracts with cannabis social clubs to enable cultivation for social clubs at our location. To this end, we will provide complete packages to offer the clubs a comprehensive cultivation service. The legislative process includes the start of cultivation for social clubs from June 2024, which is why we are actively moving forward and entering into partnerships.

## 2nd Quarter 2024

### on Preparations

In the second quarter of 2024, we will actively commence the beta testing for the DECT-Grow cultivation management system. Additionally, active customer acquisition for DECT-S2S will begin, aiming to build a substantial user base. Furthermore, expansion of the cultivation site is planned to be completed by mid-2024. During this period, we may already announce the first exchanges for listings for the DECT token.

## 3rd Quarter 2024

### DECT Token Launch & Marketing

We will launch the DECT token in the second half of 2024, depending on the achievement of the hard carp (possibly earlier). The launch will be announced and enriched with at least one listing. We will also launch an international marketing campaign for the DECT-Grow cultivation management system. In addition, we will start beta testing DECT-S2S and start experimental cannabis cultivation (depending on legislation).

## 4th Quarter 2024

### T-Grow Launch & Listings

ds the end of 2024, we will officially launch the -Grow cultivation management system and ize it with an international campaign. We will unch a large-scale marketing campaign for the S2S system. In this context, we will activate the cultivation-specific functions of the platform. For the DECT, we will announce or carry out further listings on DEX or CEX. Marketing making activities will be intensified.

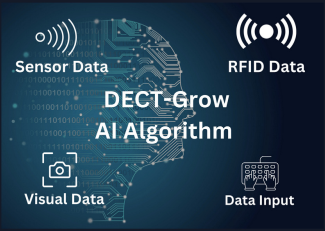
## 1st Quarter 2025

### Product Launch, Cutivation & Listing

In early 2025, the official product launch of the DECT-S2S system is scheduled. This system will be distributed internationally. The DECT token will be listed on another CEX, and the cultivation of recreational cannabis in Germany will take place at our site (subject to legislation). Depending on the status, we will aim for the expansion of the site and further development.

OUR INNOVATIVE SYSTEMS FOR THE INTERNATIONAL CANNABIS INDUSTRY

# Cannabis Cultivation Technology



DECT-Grow Cultivation Management System

DECT-S2S Seed-to-Sale System

We are one of the first companies in the world to develop innovative AI and blockchain-based systems for cannabis cultivation and apply them at our own site. Our company ecosystem, the developed systems and our unique cultivation site will be linked to the German Cannabis Token (DECT). The DECT token enables access to the cultivation systems and links modern technologies with international cannabis cultivation. We already have several years of experience in the field of blockchain solutions with our company CeBiol Blockchain Solutions GmbH. **Every company or Cannabis Social Club that wants to use the DECT-Grow or DECT-S2S systems must have DECT tokens**. The more companies want to use our systems, the greater the need and demand for DECT tokens.
